FOREWORD

The following pages contain a summary of park use statistics for 1987. All attendance is reported in terms of parties, regardless of collection method, and classified under one of three categories.

A. **Campground Attendance** includes:
- campground use (collected in parties)
- group campground use (converted to parties)
- backcountry overnight use (converted to parties)
- Bowron Lake canoeists (converted to parties)

B. **Day Use Attendance** includes:
- day use (collected in parties)
- backcountry day use (converted to parties)
- winter day use (collected or converted to parties - depending on park)
- miscellaneous day use (eg: pedestrians and cyclists - converted to parties)

C. **Boating Attendance** (boats = parties)

For many parks, monthly attendance totals have not been reported for the entire year. The absence of attendance totals does not necessarily mean visitors were not using the park, but rather the absence of staff/contractors to record the use occurring.

FACTORS FOR CONVERTING PARTIES TO VISITORS

PARTY NIGHTS	X 3.2 people/party = visitor nights
PARTY DAYS	X 3.5 people/party = visitor days
BACKCOUNTRY PARTY NIGHTS	X 3.0 people/party = backcountry visitor nights
BACKCOUNTRY PARTY DAYS	X 3.0 people/party = backcountry visitor days
BOATING PARTIES	X 3.2 people/party = boating visitors

DEFINITIONS

PARTY - A group of persons, or a person, who arrives at a park, usually in one vehicle.

PARTY NIGHT - One party staying one night.

PARTY DAY - One party visiting a day use area of a park for one day or a portion thereof.

BOATING PARTY - One boat visiting a park for either day use or overnight use.

LIMITATIONS TO ANALYSIS OF PARK ATTENDANCE DATA

Variance in use counts can be caused by a number of factors, including weather conditions, special events, highway repairs or construction, a change in the type of recording equipment, or a change in the length of the recording season. These factors should be considered when comparing data from one year to the next. This is particularly important when analysis is park specific.

To provide additional clarification for analysis of park attendance data, some figures have been flagged with an 'e', 'h', or '*' (e.g. 64e).

e - the figure noted is an estimate of use determined by field staff and Park Management Services.

h - the figure noted represents use for a half-month only.

* - the figure noted is a projected monthly total based on attendance counts collected for six or less days in the month.

* Day use figures for Barkerville Historic and Cottonwood House Historic Parks are no longer collected or recorded by the Parks and Outdoor Recreation Division. The administration of Barkerville townsite and Cottonwood House Historic was transferred to the Ministry of Tourism in 1986.

* The figures displayed represent the total number of party nights spent on the Bowron Lake Circuit. A length of stay factor of 8 and 4.4 for the Circuit and West side, respectively, has been used to obtain the monthly party night totals. This procedure differs from years prior to 1987 when only the number of canoes entering the lake chain was reported.
